Mastercard Incorporated Class A	5.3%

SECTOR WEIGHTINGS*

FUND INFORMATION

Investment Objective & Strategy: The portfolio seeks long-term capital appreciation by investing in high quality companies that demonstrate consistent and high annual dividend growth. The portfolio's additional objectives are to provide capital preservation and a growing stream of income over the long-term.

The portfolio only invests in the common stocks of companies that trade on U.S. stock exchanges, regardless of where headquartered, and exhibit a consistent pattern of dividend increases greater than that of the market as a whole and whose business, in Raub Brock's judgment, allow them to continue to raise their dividends at a high rate.

Investment Process: The investment process includes quantitative screens to define the investable universe of high quality companies that have consistently raised dividends over time and bottoms-up, fundamental research by our in-house research team to identify top candidates with sustainable competitive advantages, above average growth in earnings and dividends, and reasonable valuations for inclusion in the portfolio.

Portfolio & Environmental, Social & Governance (ESG) Restrictions: The portfolio will only invest in dividend-paying common stocks, excluding companies involved in alcohol, gambling, tobacco, civilian firearms, military weapons and nuclear power.

Benefits & Risks: We believe that investing in high quality companies with growing dividends provides the best opportunity to achieve better than market returns with less than market risk, providing superior performance in rising markets while preserving capital in falling markets. A focused, low-turnover portfolio allows superior stock selection to have a meaningful impact on performance with sufficient diversification.

The portfolio tends to underperform in early recovery or speculative periods, particularly when market rallies are driven by gains in low quality stocks. The portfolio may also underperform during periods when sectors under-represented in the portfolio outperform.

Distinguishing Characteristics:

- The portfolio only invests in companies that have increased dividends every year for at least five consecutive years at a rate faster than 10%, resulting in a portfolio with a dividend growth rate twice the market average.
- The portfolio is focused on dividend growth supported by operations, resulting in a growth over value/yield bias.
- The portfolio is more concentrated and has a lower turnover rate than peers.
- The portfolio has conformed to ESG standards since 2008.

Allocation Effect: Measure of the impact of decisions to overweight or underweight particular asset categories relative to a benchmark. A positive allocation effect results from: (a) overweighting sectors that produce greater returns than the benchmark average; or (b) underweighting sectors that produce lower returns than the benchmark average. **Selection Effect:** Measure of the impact of choosing securities that provide different returns from the benchmark. The selection effect evaluates the manager's skill in choosing better performing securities than those in the benchmark.

DISCLOSURES

*Firm and strategy assets may not be updated monthly due to delays in UMA client reporting. Top five holdings, sector weightings, risk adjusted performance, attribution and top/bottom portfolio contributors are supplemental to the Annual Disclosure Presentation at the end of this document.

Impact investing and/or Environmental, Social and Governance (ESG) managers may take into consideration factors beyond traditional financial information to select securities, which could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. Further, ESG strategies may rely on certain values based criteria to eliminate exposures found in similar strategies or broad market benchmarks, which could also result in relative investment performance deviating.

For additional information please see the Annual Disclosure Presentation at the end of this document. Performance data represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or a loss when shares are sold. Any investment in a Raub Brock portfolio involves risk of loss. None of the information contained herein should be construed as an offer to buy or sell securities, or as investment recommendations. Data, while obtained from sources we believe to be reliable, cannot be guaranteed and all statistics are subject to change.

* Total Assets include UMA assets and are not part of the GIPS® firm assets. UMA assets are accounts in which Raub Brock provides model holdings to a sponsor who then executes trades in client accounts. UMA and Total Assets are shown as supplemental information.

Raub Brock Dividend Growth Portfolio Composite contains fully discretionary segments of equity accounts that follow the core dividend growth holdings model and for comparison purposes is measured against the S&P 500 Index. The S&P 500 Index is a capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market values of 500 stocks representing all major industries. The minimum account size for inclusion in this composite is \$100 thousand.

Raub Brock Capital Management, LP claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Raub Brock Capital Management, LP has been independently verified for the periods June 1, 2001 through December 31, 2017. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The RAUB BROCK DIVIDEND GROWTH PORTFOLIO composite has been examined for the periods June 1, 2001 through December 31, 2017. The verification and performance examination reports are available upon request. On December 31, 2012, the composite's name was changed from RAUB BROCK DIVIDEND GROWTH CORE EQUITY PORTFOLIO to RAUB BROCK DIVIDEND GROWTH PORTFOLIO.

Raub Brock Capital Management, LP is a fee-only investment adviser registered with the SEC. Firm and composite assets presented include assets managed at both Raub Brock Capital Management, LP and Raub Capital Management. Raub Brock Capital Management, LP was established May 31, 2001, and composite performance and assets presented prior to then consist entirely of Raub Capital Management. This track record has been reviewed for compliance with the portability requirements of the GIPS standards. The firm maintains a complete list and description of composites, which is available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the US. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Non-fee-paying accounts are included in the composite.

Beginning December 31, 2014, net of fee performance is calculated using actual management fees. Pure gross returns for bundled fee accounts are presented as supplemental information and do not reflect the deduction of any trading costs, fees, or expenses and are presented for comparison purposes only.

Prior to December 31, 2014, the highest annual fee of 1% was applied to the composite and compounded monthly in order to appropriately present net performance. Gross returns prior to 2014 reflect the deduction of trading costs. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

Beginning December 31, 2012, composite policy requires the temporary removal of any account incurring a client initiated cash inflow or outflow of at least 10% of account assets.

Bundled fees include brokerage commissions and other trading expenses, investment management fees, consulting fees, transaction fees, and custodial fees. UMA accounts pay an all-inclusive fee based on a percentage of assets under management. In addition to Raub Brock's management fees, this fee may represent commissions, portfolio monitoring, consulting services, and custodial services charged by the UMA sponsor. UMA fee schedules are provided by independent UMA sponsors and are available upon request from the respective UMA sponsor.

Raub Brock's standard management fee schedule is as follows: 1.25% of assets up to \$500 thousand, 1.00% of assets \$500 thousand to \$2.5 million, 0.80% of assets \$2.5 million to \$5 million, and 0.60% of assets over \$5 million. Actual investment advisory fees incurred by clients may vary.

For the years 2000 through 2008, balance portfolio segments make up 88.7% of the composite and performance and market values for these segments reflect a required total segment plus cash return using a predetermined cash allocation percentage. The remaining 11.3% of the composite constitutes total segments plus actual cash.

The Raub Brock Dividend Growth Portfolio Composite was created September 1, 2006. A copy of the verification report is available upon request.
